

INVITATION AND PROGRAMME
To

International Workshop on User centricity – state of the art

http://www.mobilesummit2007.org/workshop_information

In conjunction with the 6th IST Mobile and Wireless Communications Summit

Budapest, Hungary
5th July 2007

The overall purpose of this workshop is to get an overview of how different IST projects handle the user-centricity (such as user requirements and “translation” of these into technical specifications) and to discuss problems and ways of dealing with these. The workshop aims to initiate discussions on state of the art in terms of handling user-centricity in designing and implementing future mobile, wireless technologies. By exchanging views, best practices and lessons learned, and sharing experiences in this area, it is the hope that the different IST projects might learn from each others and become better at handling these perspectives.

Programme for the workshop:

- 9.00-9.10: Introduction to the workshop
Lene Sørensen (CICT/IMM, Tech. Univ. of Denmark)
- 9.10-9.35: Crafting Infrastructures. Requirements, scenarios and evaluation in the SPICE project
Luca Galli (NEOS)
- 9.30-10:00: User-Centricity in the MAGNET and MAGNET Beyond Project
Jakob Eg Larsen, Lene Sørensen, Henning Olesen, Nette Schultz and Su-En Tan (CICT/IMM, Technical University of Denmark)
- 10:00-10:25: Amigo – User-centred methodologies for Network Home Application Development
Maddy Janse (Philips Research)
- 10.25-10.50: Introducing the user to the service creation world: concepts for user centric service creation, personalization and notification
Jorge Caetano (NEC Portugal), Pedro Santos (NEC Portugal), Paola Renditore (Telecom Italia), Matteo Demartini (M3S srl), Paolo Falcarin (Politecnico di Torino), Carlos Baladrón (Univ. de Valladolid), Javier Aguiar (Univ. de Valladolid), and Belén Carro (Univ. de Valladolid)

10:50-11:10: Coffee break

11:10-11:35: Gathering requirements for multilingual search of audiovisual material in cultural heritage

Sam H. Minelli (Alinari IDEA), Jennifer Marlow (Univ. of Sheffield), Paul Clough (Univ. of Sheffield), Juan M. C. Recuero (Univ. Nacio. de Educación a Distancia), Julio Gonzalo (Univ. Nacio. de Educación a Distancia), Johan Oomen (Neth. Inst. for B&G), and Domenico Loschiavo (Alinari IDEA)

11:35-12:00: e-SENSE – Translating user requirements into technical requirements for ambient intelligent mobile systems

Karim Yaici (University of Surrey), Astrid Oehme (Human Factors Consult), Fabrice Forest (Université Pierre Mendès-France)

12:00-12:25: What users want – user-centricity in technology driven projects

Ingrid Mulder (Telematica Instituut)

12:25-13:00: Discussion: What is user centricity?

Registration:

Participation in the workshop is free for all participants in the 6th Summit on Mobile and Wireless Communication. Participants in the workshop will receive a CDROM with the proceedings of the workshop. It is however, necessary to register to the conference.

Registration can be done by sending an e-mail with contact information to *lene@cict.dtu.dk* and must be done before *June 25, 2007*.

Workshop coordination

Lene Sørensen* and Herma van Kranenburg°

*Center for Information and Communication Technologies, CICT, IMM, Technical University of Denmark (affiliated with MAGNET Beyond); email *lene@cict.dtu.dk*

°Telematica Instituut (affiliated with SPICE); email *Herma.VanKranenburg@telin.nl*
